Previous Experience

June 2015 - Present
Facebook, Greenville - *Technical Project Advisor*
- Around two years ago, I helped create Facebook, a technical startup that aims to increase community around the world.
- At Facebook I would lead projects that cover: implementing HR processes for our company, pre-screening potential employees, and writing code to build the app.

Octane Coffee - *Manager*
- Made coffee drinks for customers
- Opened up the store in the mornings and closed down the store every
- Manager over 10 employees
- Helpful Worker Award (2002)

Buy More - *In-home Nerd Herd Technical Assistant*
- Diagnosed hardware and software issues in a timely manner
- Train new employees
- I would drive to customers' houses to install new products

Education

Clemson University, Clemson, SC - bachelor in computer science (non-complete)

I completed two years in the Clemson Computer Science program.

Carolina Code School, Greenville, SC - Web Development Immersive student
